VULCAN S FEATURES

Comfortable seat

Sculpted seat design with thick padding offers excellent comfort and good hip support.

Large disc brakes

Large-diameter disc brakes balance ample stopping power with easy control for beginning riders.

Easy-to-read instrumentation

Original-design instrumentation cluster features an analogue-style tachometer and multi-purpose LCD. Convenient features keep riders fully informed of operating conditions.

Long wheelbase

Wheelbase of 1,575 mm was chosen for a balance of light handling and superior riding stability. The same characteristics that make it fun to ride (light handling and relaxed, rider-friendly ergonomics), also make the Vulcan S ideal for new riders.

Adjustable Footpegs

3-position footpegs allow riders to adjust foot position to suit size and preference. Three positions available: STD, 25 mm forward, 25 mm back.

Relaxed, foot-forward riding position

The compact engine and slim frame result in a design that is narrow at the knees and feet. Forward positioned footpegs are ideal for relaxed, cruiser style riding.

Low seat height

Being able to easily put your feet on the ground when stopped is one of the most important factors in feeling comfortable on a motorcycle. At 705 mm, the Vulcan S's low seat is very accommodating.

Modern, urban styling

Flowing style with long-and-low stance and modern elements like the original headlamp and cast wheels with five spoke pair design give the Vulcan S very non traditional cruiser looks.
