NINJA 650 FEATURES

KTRC (Kawasaki TRaction Control)

Kawasaki's advanced traction control system provides both enhanced sport riding performance and the peace of mind under certain conditions to negotiate low-traction surfaces with confidence. Two modes allow riders to adjust settings to suit the riding situation and rider preference. Riders may also elect to turn the system OFF. For 35 kW kit models, KTRC offers one mode (plus OFF).

TFT Colour Instrumentation

The all new digital TFT colour instrumentation – a Kawasaki first in the 650cc class – gives the cockpit a high-tech, highgrade appearance. The new meter also offers additional features unavailable on the previous model.

12v Power outlet

12v Power outlet allows for charging or use of externally mounted sat nav power supply

Improved riding position

Prioritising a sportier appearance, the redesigned windshield is now lower and flush-fit with the upper cowl. It is set at a more upright angle to offer the rider decent wind protection.

Increased Passenger Comfort

Rear seat with 4 thicker urethane (approximately 5 mm thicker at the centre, 10 mm thicker at the sides) and sides that extend more widely offers increased passenger comfort.

Smartphone Connectivity

A Bluetooth chip built into the instrument panel enables riders to connect to their motorcycle wirelessly. Using the smartphone application "RIDEOLGY THE APP," a number of instrument functions can be accessed, contributing to an enhanced motorcycling experience.

LED Headlights

Twin LED headlights, each featuring low and high beam as well as a position lamp, offer increased brightness.

Improved Windshield

Prioritising a sportier appearance, the redesigned windshield is now lower and flush-fit with the upper cowl. It is set at a more upright angle to offer the rider decent wind protection.
